To run toward danger when everyone else is running away, you must have trust in the team that runs alongside you and in the companies that provide the critical tools you use to stay safe. We're proud to have earned your trust as the leading manufacturer of the products you rely on to perform wherever and whenever you need them most. Our longstanding commitment to excellence and innovation is the foundation of our legacy, and since 1952, we've proudly designed and manufactured our products right here in America.

We're driven by our mission to protect you as you protect and serve your community.

And we're with you all the way, no matter where you're called to.

Clearing the way.

Securing the scene.

Sending you home safe night after night to the ones you love.

We never left, and we're here to stay.

## WHELEN CLOUD PLATFORM®

#### **GET ALL THESE FEATURES AND MORE**

Digital Alerts: Send advancewarning alerts to notify motorists when emergency vehicles are approaching or stopped ahead. Real-time alerts improve motorists' situational awareness and reduce the likelihood of collisions by up to 90%.

Responder-to-Responder Alerts: Help prevent intersection collisions by automatically notifying other emergency vehicles in active response mode when approaching the same intersection.

Maintenance: Easily keep track of important vehicle data like service schedules, mileage, and engine hours enabling fleet managers to make informed decisions on repairs.

Geofence Controlled Tech: Utilize set geographic boundaries to trigger automated functions that can help keep first responders and motorists safe. Program lights and tones to change automatically as a vehicle approaches an intersection until it reaches a safe location.

Traffic Preemption: Mitigate risk and expedite emergency response times by automatically clearing intersections, reducing the likelihood of collisions, creating faster response times, and ensuring officers reach their destinations safely.

#### **VEHICLE SAFETY GATEWAY® (VSG®)**

The VSG communicates to the Whelen Cloud using its own SIM card and a separate, low-profile antenna. Verizon frontline support available for qualifying users.

## THE NEW STANDARD **IN EMERGENCY SCENE SAFETY**

The Whelen Cloud Platform® is a state-of-the-art, cloud-based vehicle communication system enhancing first responder safety and efficiency. With seamless connectivity between fleet vehicles and across agencies via cellular networks, our platform offers real-time digital alerts, geofence-controlled technology, and traffic preemption to ensure faster, safer responses. Effortlessly manage vehicle configurations and firmware updates over-the-air, and accurately pinpoint vehicle locations for coordinated operations. All data is securely accessible anytime, anywhere, allowing for optimal fleet organization and enhanced safety at roadside scenes.

Easily manage and track fleet vehicle data from your computer, smartphone, or tablet.

We're Always Adding **New Features!** Visit whelen.com/cloud to learn more.

- Exterior antenna: 7.08" L x 2.76" W x 2.41" D
- Interior antenna: 7.01" L x 2.36" W x 0.75" D

Efficiency meets precision with our Intelligent Control Systems.

Seamlessly manage your fleet's warning lights and sirens with our advanced technology to ensure swift response times and enhanced safety on the road.

#### **FEATURES**

#### **Digital Voice Messages (DVM)**

•Configure consistent messaging across your fleet.

#### Dynamic Variable Intensity (DVI)

•Gradually increase and decrease warning light intensity.

#### Vehicle-To-Vehicle (V2V) Sync

•Automatically synchronize lights and tones on vehicles within any proximity to aid approaching motorists.

#### **SEAMLESS INTEGRATION**

#### **WeCanX®**

•Synchronize your entire system with greater speed, peripheral add-ons, and full diagnostic support.

#### Whelen Cloud Platform®

•Send and receive data using cellular networks to manage your fleet with our cloud-based vehicle platform.

#### Whelen Command®

•Process hundreds of virtual inputs and receive updates and new releases on your products.

### CenCom Core®

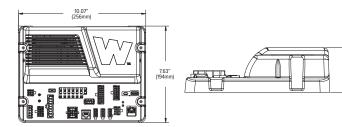

Created to enhance first responder safety, CenCom Core redefined control systems by providing the greatest configurability, speed, and expansion yet. Built to scale with your needs, Core\* is highly configurable and offers advanced automation, remote connectivity, and true system synchronization.

C399

#### **FEATURES**

- •Supports any combination of up to 99 WeCanX devices
- •Remote firmware updates through USB-C with Whelen Command or over-the-air with Whelen Cloud Platform®
- •17 total inputs
- •23 total outputs

## Core-S®

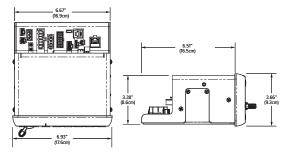

100 200 PIAG DIVI W X CORE-S.

The newest addition to Whelen's industry-leading Core® family of control systems, Core-S is a true one-box solution. Its space-saving design allows for installation in tight spaces like in a console or under a dash. And installation has never been easier with connector placement specifically designed for hard-to-reach areas. Core-S features a siren, input/output, and control functionality in one compact box along with an integrated control head.

#### **FEATURES**

- •Remote firmware updates through USB-C with Whelen Command® or over-the-air with Whelen Cloud Platform®
- •11 total inputs
- •16 total outputs

### Core-R®

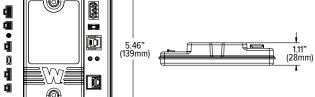

Core-R is a vehicle control system engineered to enhance first responder and motorist safety with complete configurability, advanced automation, and remote connectivity.

#### **FEATURES**

- •Supports any combination of up to 99 WeCanX® devices
- •Remote firmware updates through USB-C with Whelen Command or over-the-air with Whelen Cloud Platform
- •8 total inputs

5.76" -(146mm)

## Core-C®

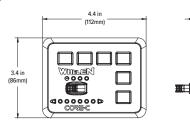

Core-C is a sophisticated warning light system for vehicles with limited space. Delivering enhanced WeCanX safety features with plug-and-play ease of installation, it combines the intelligence of a WeCanX controller with the functionality of a control head in one compact package.

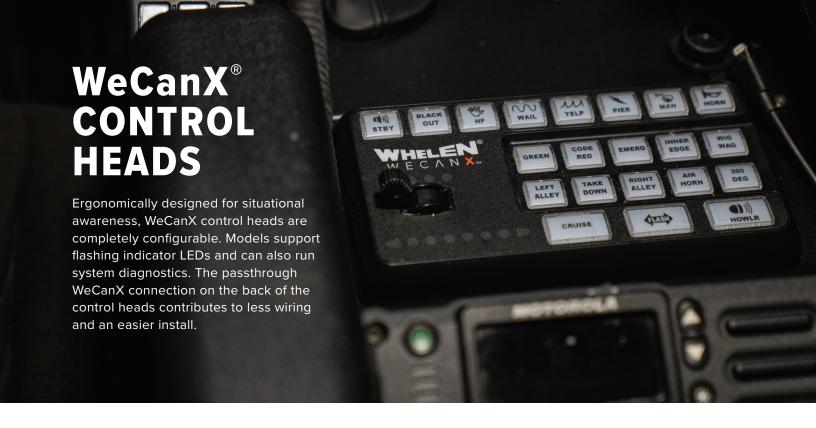

#### **FEATURES**

- Supports primary WeCanX devices
- •Supports one Remote Expansion Module
- •Remote firmware updates through USB-C with Whelen Command
- •1 ignition power-up input
- •1 output

**Tech Glossary** 

### BroadBand Blue®

BroadBand Blue delivers a higher intensity, creates a larger optical image, and produces a more consistent color, all while being easier on the eyes - especially at night.

### **Conformal Coating**

A thin material that conforms to the contours of the PCB to protect the electronic components from harsh environments and impact.

Two-color interleaved with independent control of color one and color two

### DVI"

DVI patterns gradually increase and decrease warning light intensity, which better conveys visual information to approaching motorists at night. These patterns clearly indicate when a vehicle is parked and improves a driver's ability to safely navigate around a work zone.

Two-level technology

### F Block

Whelen's patented E Block technology protects against the elements by creating a watertight seal around a unit's stranded wires, preventing moisture from entering the lighthead.

### **Encapsulated**

Lightheads are fully encapsulated for moisture and vibration resistance.

### **Hard-Coat**

Whelen's industry-first innovative Hard-Coating process counteracts the effects of environmental and chemical damages to our lenses and domes.

### Linear-LED° - (Super-LED°)

Whelen's optimized use of the latest generation of LEDs and unique reflector optics to produce highly intense light that has superior wide-angle visibility and rivals strobe in performance.

### Low Current

Low current function wires require less than 0.25 amp to operate, allowing for simple operation of each lightbar function.

### ProFocus<sup>®</sup>

Whelen's innovative single optic LED technology that can be customized and programmed as a spotlight or floodlight, with no moving parts.

### Proclera® Silicone Optics

Whelen's innovative and efficient solution to distorted optical shape and fringe lighting. Proclera Optics feature 100% internal silicone optic technology, an increased ability to harness LED output and better direct and focus light, and a fully-filled square TIR optic to increase optic efficiency compared to a conventional circular

### Rota-Beam®

Solid-state "rotating" technology, simulating the appearance of a rotating beacon without any moving parts or motors for long-life reliability.

### Scan-Lock

Whelen's advanced method of changing a products flash pattern. Scan-Lock utilizes an external wire to allow the user to cycle through the entire range of flash patterns, allowing for full customization.

### Scan-Lock"+

The Scan-Lock+ app is the simplest way to change Whelen flash patterns. Designed for optimal convenience, Scan-Lock+ features an easy to use interface and utilizes a Bluetooth connection. Download the Scan-Lock+ app and browse, test, and assign Whelen flash patterns right from your

### **SmartLED®**

Whelen's distinctive use of self-contained electronics to power and flash a particular LED product. These products require no external flasher, ballast, or power supply to operate.

### **SOLO**®

Single-color LEDs

Two-color lighthead where each color fills half of the reflector

### Standard Current

Lightbar functions are wired directly to the switching device and require switches that are matched to the current draw of the desired functions to be activated.

### Steady-Lock®

A time-saving feature that allows Whelen's most popular warning lightheads to be set to Steady automatically when used with a CenCom Core® system.

### Super-LED®

Whelen's innovative LED technology

Sync provides the ability to connect multiple Whelen devices to flash together or in alternating patterns. Products with this capability allow the user to create coordinating flashing schemes.

### TIR" - (Total Internal Reflection)

Whelen's optimized use of the latest generation of LEDs and unique reflector optics to produce highly intense light that can be directional in nature.

Three-color interleaved with independent control of color one, color two, and color three

Engineered for optimal accessibility, WeCad lightbar designer delivers the ability to design custom Whelen lightbars with every available option. Adding R65 compliant options is simple, and a bill of materials will be generated to make ordering fast and easy.

### WeCan®

Whelen's proprietary CAN-based communication system

Whelen's smartest and most powerful CANbased communication system. WeCanX provides true system synchronization, greater speed capabilities, expanded peripheral add-ons, and full support of diagnostics.
